

Ten questions you should ask before purchasing a used car.

- Are all factory required maintenances current within 3,000 miles?
- Are the brakes at a minimum of 40% remaining on all 4 wheels?
- If needed, has the timing belt been replaced?
- Are all factory recalls checked and performed?
- Do all the tires have at least 50% tread and match?
- What warranty comes with the car and what does it cover?
- Do they have a CARFAX to show you?
- Do they provide more than one set of keys?
- Do they provide an owners manual?
- Will they show the inspection and the corrections they performed?

This is just a sample of what we do to our pre-owned cars, trucks and sport utility vehicles. Remember, not knowing the answer to the questions above could cost you thousands more than you think you might save by only talking about price.
