

PhatNoise™ Digital Car Audio System

Drivers wanted. 

Your music. All the time.

No more decisions. No more limits. All your music, anywhere you go.

TOTAL
CONTROL

Volkswagen's new **PhatNoise™ Digital Car Audio System** puts thousands of songs (up to 500 CDs) at your fingertips, with an onboard voice-enabled search to let you browse your music collection by Playlist, Album, Artist, and Genre – so you never have to take your eyes off the road.

Going digital has never been so easy ... or so enjoyable. Stacks of CDs convert into a palm-sized

digital, portable collection, completely integrated with your VW's car stereo for great digital sound.

Your morning commute will take on new meaning as you listen to best-selling audio books, magazines, and newspapers from Audible. A free month of service is included to get you started. And drive away happy with premium sample tracks from EMI Recorded Music.

Driving music technology: PhatNoise is your ticket to listening freedom behind the wheel.

TONS OF
MUSIC

**Using Volkswagen's PhatNoise™ Digital Car Audio System is a simple four-step process:
Sort, Load, Dock, and Play.**

Sort

With the included Music Manager software, creating and organizing digital music has never been easier. Using your home computer, digitally encode your entire CD collection; choose from multiple digital formats: MP3, WMA, WAV, and FLAC; access your existing MP3s; and create hundreds of custom playlists. Plus, get scheduled downloads of the *Wall Street Journal* or other leading newspapers from Audible.

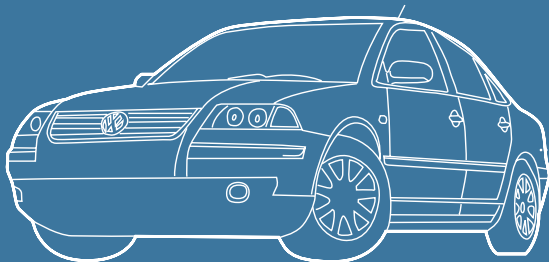

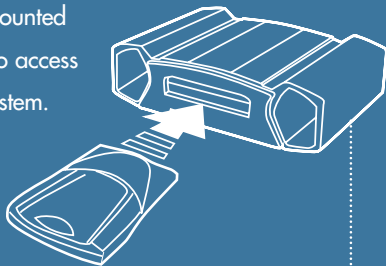

Load

Ready to hit the road? With the one-click “synch” feature, the software transfers your music to the included DMS cartridge using the dedicated USB cradle. Adding new music is fast and easy.

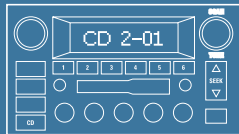

Dock

Insert your DMS cartridge into the trunk-mounted player and use the voice-enabled search to access music instantly through your VW stereo system.

Play

Sit back and enjoy the ride. Browse your music collection as the system announces the Playlist, Album, Artist, and/or Genre without you ever taking your eyes off the road. No driving distractions – just more music than you ever thought possible.

**PhatNoise. It's a true breakthrough in driving music technology.
And the best way yet to stuff your Volkswagen with music.**
